**Illuminate
Your Path to
Greatness**

A person is shown from behind, sitting in a black gaming chair with blue luminescence. Their arms are raised in a celebratory gesture. They are wearing a blue long-sleeved shirt and a blue wristband. In front of them is a desk with a computer monitor and two blue speakers. The background is a dimly lit room with blue and purple ambient lighting and vertical light strips.

POWER ON

Esports is one of the most dynamic, exciting, and fastest growing sports on the planet. Not to mention one of the fastest growing facets of the global gaming industry. The thrill is unrivaled for the millions of fans who watch every month and wager millions each year. But the question is, how can casino operators, esports tournament operators, and software suppliers maintain esports' integrity while also continuing to grow?

IT'S A TEAM SPORT

GLI's team of wagering experts are passionate about the sport and about ensuring continued integrity within organized competitions. The GLI team seamlessly blends their wagering expertise and thought leadership with GLI's strong and unique position in the global gaming industry. The result is an unmatched skillset that helps the esports industry leverage its self-regulation with GLI's technical and cybersecurity expertise. That combination helps to create an even greater level of confidence for stakeholders in traditional gaming markets. Whether you're a casino operator, esports tournament operator, or a software supplier, when you enlist the GLI team to play on your side, you have a powerful partner with a deep bench of knowledge.

HOW GLI SUPPORTS THE ESPORTS INDUSTRY

At GLI, we help operators and suppliers of all sizes and of all types navigate the future of gaming. We are globally recognized for our certification, training, and knowledge. It's these areas of expertise that have drawn casino operators and software suppliers worldwide to GLI, and is how together, we help to maintain the integrity of the industry.

CERTIFICATION

With the repeal of PASPA and more and more States and Tribes coming on board with sports wagering across the U.S., that has helped to usher in wagering on esports events in some markets. We can test and certify esports wagering equipment, as well as the security of the environments within which they operate, to demonstrate compliance with sports betting regulations, GLI-33 Event Wagering Standards, or other appointed industry best practices. Our network of 24 labs is interconnected, so your work continues day and night, wherever you are in the world.

GLI HELPS TO ENSURE THE **INTEGRITY**
OF THE GAME
FOR OPERATORS, SUPPLIERS, AND –
ULTIMATELY – THE GAMING PUBLIC.

**ESPORTS IS OUTPACING

PROCEDURE/ DOCUMENT REVIEW

We can support the creation and audit of local venue control maintenance procedures for equipment, and we provide any necessary documentation for independent evaluation of procedures if needed/ requested by an esports authority.

CONSULTATION

We provide the vital consultation to keep you ahead of the game. Our consultation services include:

- Creating procedures for verifying esports gaming equipment to confirm equivalency prior to competition, including: system hardware, player devices, client software mods, communications systems, configurations, and display devices, etc.
- Controls to prevent locally installed cheats, mods, wallhacks, aimbots, and others
- Developing procedures for the venue to document and vet athletes prior to major events (i.e. restricted/banned players, association with event organizer/official, etc.)
- Industry best practices for handling match-fixing/ tournament manipulation and unfair performance enhancing actions such as cheats, collusion/ stream-sniping, and more
- Procedures for the venue to handle equipment malfunctions during the course of a competition
- Industry best practices for competition rules, controls, and exception handling
- IT infrastructure best practices to support competition integrity and mitigate hacking
- Consulting with Tribal and State regulators as necessary while utilizing GLI's globally trusted relationships with regulatory agencies

THE AVERAGE MONTHLY ESPORTS AUDIENCE SIZE
WILL JUMP TO 276 MILLION BY 2022.
